CHALLENGES

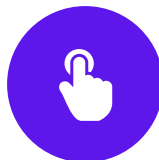

The \$50B enterprise organization was facing challenges with cloud deployment, where customers spent hours manually configuring and deploying resources on both AWS and Azure platforms. This led to inefficiencies, errors, and a poor user experience. The company recognized the need for automation solutions to improve customer satisfaction and increase operational efficiency.

SOLUTIONS

Automate Cloud Deployment: Develop automated cloud deployment solutions using Terraform and Ansible to reduce manual effort.

Create Marketplace Solutions: Design and develop marketplace solutions that customers could purchase on both AWS and Azure marketplaces. *Improve User Experience:* Deliver a better user experience for customers by providing streamlined and efficient cloud deployment.

CONCLUSION

1

Invest in Automation Solutions

Develop automated cloud deployment solutions using Terraform and Ansible to reduce manual effort and improve operational efficiency.

2

Create Marketplace Solutions

Design and develop marketplace solutions on both AWS and Azure marketplaces to provide customers with easy access to cloud resources.

3

Focus on User Experience

Prioritize user experience when developing automation solutions, ensuring seamless and efficient deployment that meets customer needs.
